Miami, Florida, March 15, 2006...BR-111™ Exotic Hardwood Flooring announces the addition of four new products to its popular Triângulo® Engineered line. The premium quality flooring represents an excellent value in exotic hardwood flooring and is now available in five Brazilian species and seven SKUs.

Featuring a thick sawn wear layer, Triângulo® Engineered may be used in commercial or residential applications, on, above, or below grade, following instructions for staple, floating or glue-down installation. The product carries a 24 year residential and three year light commercial warranty.

“Since its introduction, the Triângulo® line has steadily grown in popularity,” said Jason Strong, vice president of sales and marketing at BR-111™. “The thicker wear layer provides the durability of solid hardwood flooring and the surface may be sanded and refinished,” continued Strong.

The expanded Triângulo® Engineered products are available exclusively through the new BR-111™ Fashion Under Foot™ merchandising program. Amendoim, Maduro Chestnut, Oscuro Tigerwood and Santos Mahogany join Brazilian Cherry, Tiete Chestnut and Tigerwood to complete the collection.

Triângulo® Engineered features a durable hardwood core that is precision milled to a 3 1/4” board width and 3/8” overall thickness. A crystal clear aluminum oxide finish protects the wear layer. The product is packaged in random lengths from 12” to 42”.

Celebrating its 15th anniversary, BR-111™ continues to be a leader in the exotic hardwood flooring arena, providing products that are recognized for their beauty, performance and overall value. Exciting new hardwood species and innovative products, ranging from prefinished solids to engineered flooring, are researched and developed annually in an on-going effort to achieve the ultimate level of quality and excellence.
